

DATA ANALYTICS PORTFOLIO

Andrew Ingrassia

PROJECTS

1

GameCo

Analyzing global video game sales

2

Influenza Preparation

Planning for an upcoming flu season

3

Rockbuster

Designing a strategy for the launch of a new online video service

4

Instacart

Analyzing sales data for insights and improved segmentation strategies

5

Pig E. Bank

Supporting anti-money laundering compliance with analytical insights

6

Exploring World Happiness

Analysis of data from the World Happiness Report

GAMECO

Tools Used

Excel, Pivot Tables, PowerPoint

Goal

To perform a descriptive analysis of video game sales data in order to help leadership understand how newer games are likely to fare in the market.

Presenting Results

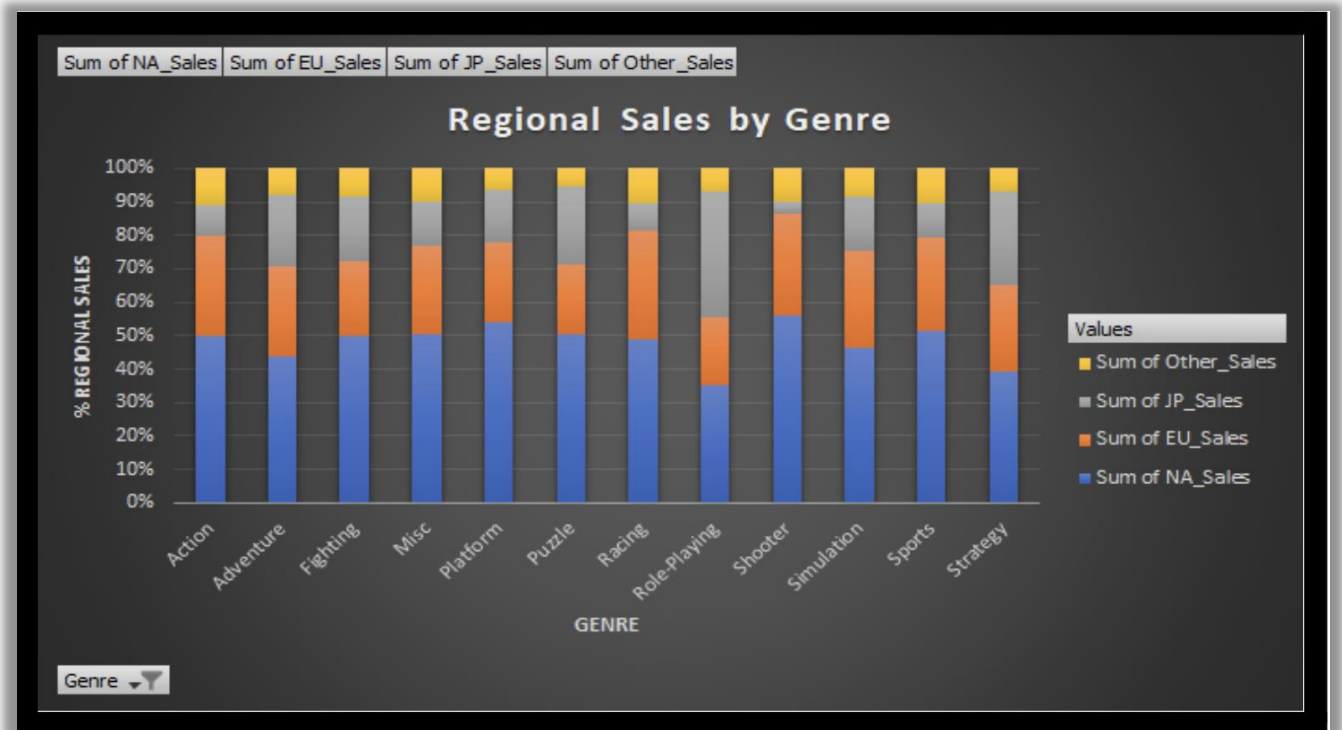

KEY TAKEAWAY #1

- Video game sales within North America, Europe, and Japan have changed significantly over time.
- The increasing popularity of video games as well as changes in population size appear to be the major drivers of these changes.

KEY TAKEAWAY #2

- Regional video game genre preferences are not universal - the data indicates that they vary significantly.
- This information can be used to determine how marketing funds are spent within a specific region.

INFLUENZA PREPARATION

Tools Used

Excel, Tableau, PowerPoint

Goal

To help a medical staffing agency determine when to send staff, and how many, to each state during an upcoming flu season.

Storytelling with Tableau

Presenting Results to an Audience

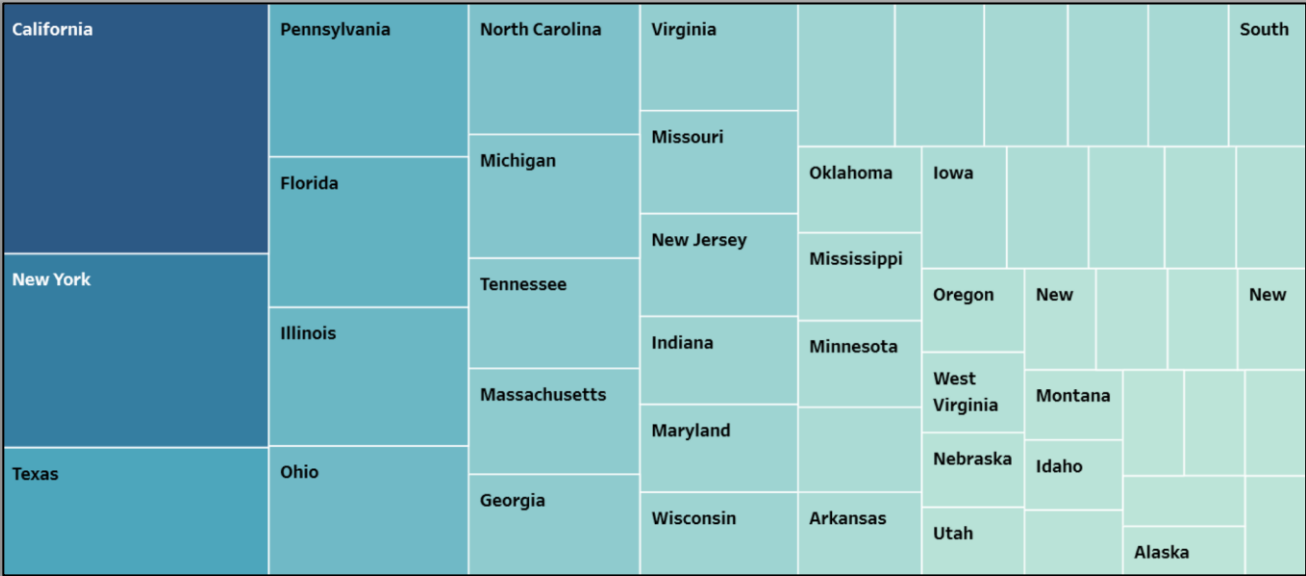

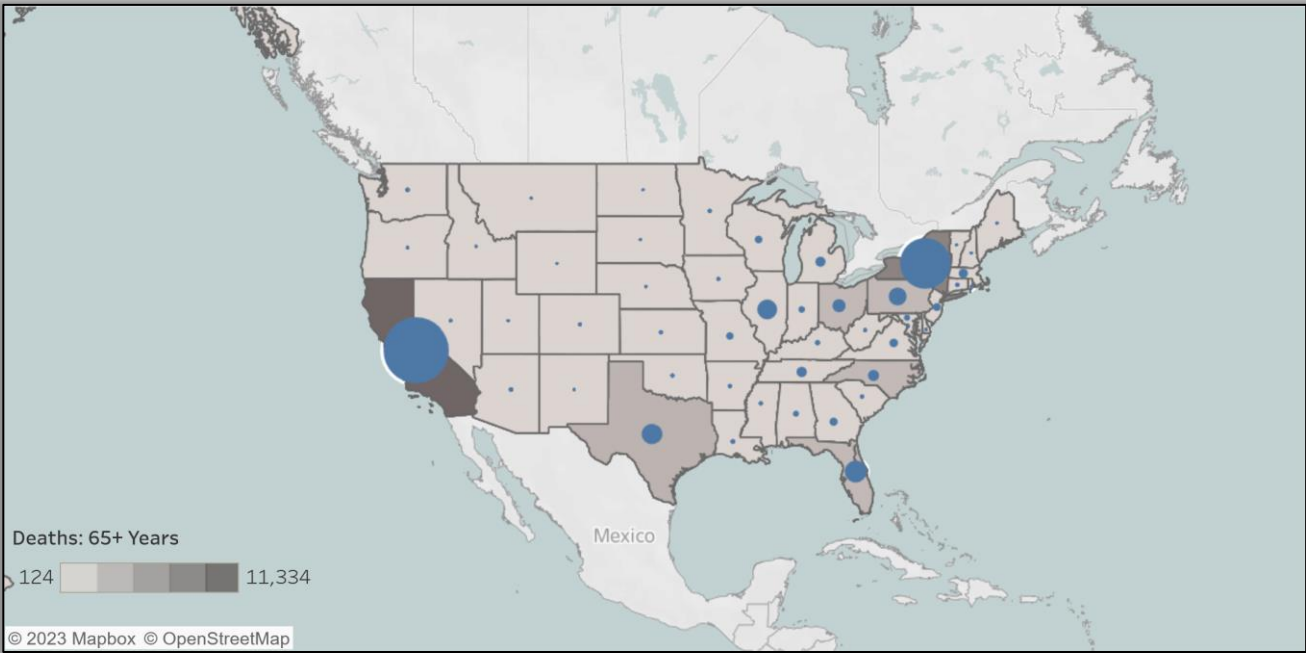

KEY TAKEAWAY #1

Individuals aged 65 years and older experience the greatest impact during an outbreak of influenza.

KEY TAKEAWAY #2

- Some states are more impacted than others.
- The states most impacted by influenza outbreaks between 2009 – 2017 were California, New York, Texas, Pennsylvania, and Florida.

KEY TAKEAWAY #3

Based on influenza seasonality patterns observed between 2009 – 2017, it is projected that the most severe impact of the upcoming flu season will take place between December 2017 and March 2018.

ROCKBUSTER

Tools Used

Excel, SQL, Tableau, PowerPoint

Goal

Analyze a fictional movie company's data, answer key business questions related to movie revenue, customer behavior, and regional sales, and present the findings in order to aid the company's 2020 strategy

Optimization

KEY TAKEAWAY #1

The highest revenue movie genres are sports, sci-fi, animation, drama, and comedy.

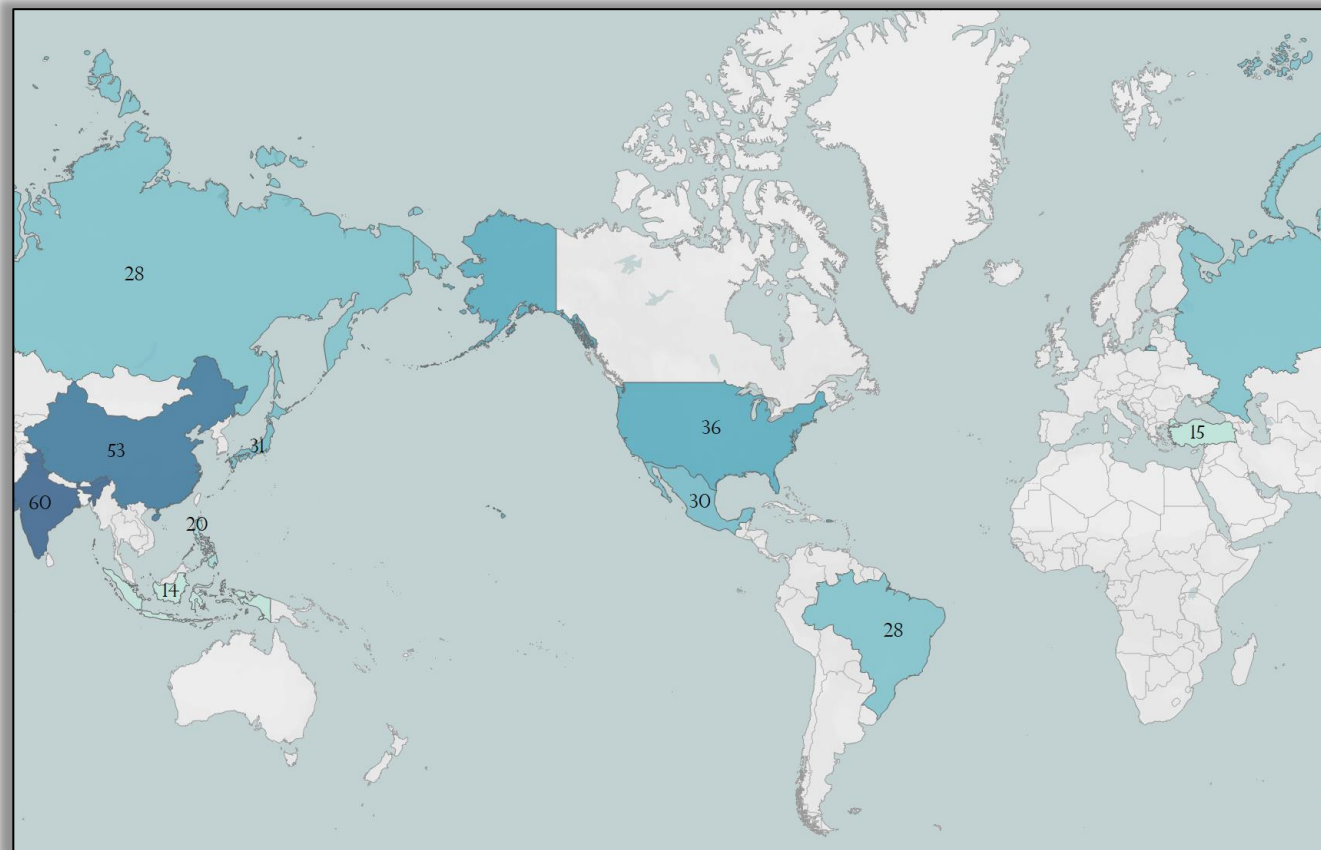

KEY TAKEAWAY #2

Movies with a PG-13
MPAA rating bring in the
most revenue.

KEY TAKEAWAY #3

The highest revenue countries are India, China, The United States, Japan, and Mexico (in that order).

INSTACART

Tools Used

Python, Pandas, Jupyter, Excel,
PowerPoint

Goal

Analyze Instacart's data, derive insights,
and suggest strategies for marketing
based on customer segmentation to
improve sales and customer targeting.

Population
Flows

KEY TAKEAWAY #1

- Instacart experiences the highest order frequency on the weekend, with Saturday being the busiest day.
- Tuesdays and Wednesdays are the least busy.
- Highest order frequency occurs between 9am and 5pm.
- **Recommendation:** Schedule ads on Tuesdays and Wednesdays after 3pm.

KEY TAKEAWAY #2

- Customers were divided into 3 categories according to the frequency with which they shopped at Instacart.
- "Loyal" customers have fewer days between orders than "Regular" customers.
- **Recommendation:** Consider offering benefits (such as a rewards program) to customers to encourage more frequent ordering

PIG E. BANK

Tools Used

Excel

Goal

To analyze bank data to find out which client characteristics can help predict if a particular client is likely to leave the bank. To achieve this, a decision tree will be created.

Time Series
Analysis

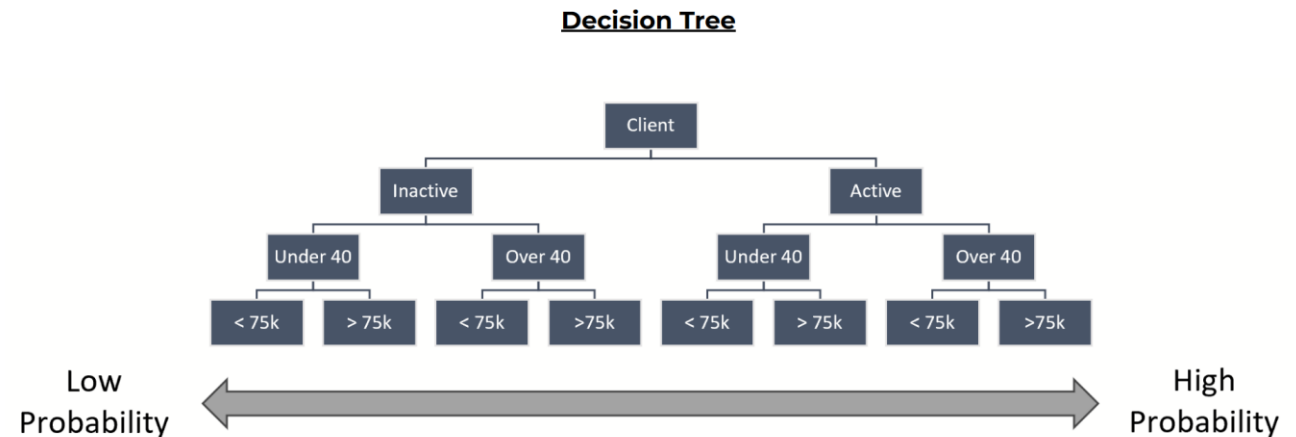

Forecasting

KEY TAKEAWAY

Criteria that determine the probability of a client leaving the bank

- 1) The frequency with which a given client interacts with the bank
- 2) Whether or not a client is over 40
- 3) Whether or not a client has an account balance greater than \$75,000

EXPLORING WORLD HAPPINESS

Tools Used

Python, Pandas, Numpy, Seaborn,
Plotly, Matplotlib, Scipy,
sykit-learn, statsmodels,
geopandas, Tableau

Goal

To assess the relative impact of the 6
key variables measured in the World
Happiness Report.
