BILLING ANALYST | DATA ANALYTICS | PROCESS AUTOMATION

SUMMARY

Billing analyst with 2+ years of experience working with billing systems, SQL, Snowflake, and operational data. Independently developed Python-based automation tools and a project-tracking dashboard to improve undocumented team processes, using AI-assisted development to build solutions beyond the scope of my formal role. Background includes a decade running an independent business and six years as a U.S. Army National Guard veteran.

SKILLS

Data & Analytics: SQL, Snowflake, Excel, Data Cleaning, Data Transformation

Billing Systems: CSG Product Configurator, CCS, Billing Data

Programming & Automation: Python, Process Automation, AI-Assisted Development

Business & Operations: Process Optimization, Process Documentation, SOP Creation, Cross-Functional Collaboration

EXPERIENCE

Billing Analyst | Charter Communications | Maryland Heights, MO | Nov 2023 – Present

- Configure and update billing systems using CSG Product Configurator; query and compare datasets in Snowflake, and interact with billing databases through CCS
- Execute and adapt SQL queries to extract and transform billing data in support of system updates and field operations
- Conduct peer reviews to ensure accuracy and alignment with standards under production deadlines
- Independently built four Python-based automation tools using AI-assisted development, eliminating manual steps in a previously undocumented billing process
- Built and maintain a project-tracking dashboard and authored the first process documentation and SOPs for the workflow, replacing undocumented processes with a structured system for managing work and preserving institutional knowledge

Painting Business Owner | Ingrassia Painting Services | Saint Louis, MO | Sep 2014 – Nov 2023

- Independently operated all aspects of a residential painting business — sales, marketing, bookkeeping, production, logistics
- Built a client base generating 95% of new business through word-of-mouth referral, reflecting sustained service quality and relationship management

Infantryman & Combat Medic | Missouri Army National Guard | Saint Louis, MO | Apr 2009 – Apr 2017

- Served in infantry and combat medic roles, delivering medical care and maintaining unit readiness during routine and training operations; honorably discharged after six years of service

PROJECTS

- **Uplift** — Independent mobile workout app for tracking progressive overload; designed data structure and trend visualizations (line charts, PR tracking); handled UI/UX design; built using AI-assisted development. Currently in TestFlight beta
- **Risk Dice Roller** — Python-based dice-rolling tool built independently, prior to AI-assisted coding tools being in common use

EDUCATION

Lindenwood University — B.A. | Saint Charles, MO | May 2011

CareerFoundry — Data Analytics Certificate | Sep 2023
